The high quality of Wefood Himalayan Salt dates back to before the production phase! This type of salt, which has joined the Wefood product family as a result of long and comprehensive research, is supplied from the geographies of origin whose natural conditions are preserved in order to offer the highest quality. In order to prevent the product from being cross-contaminated with gluten-containing products, the entire production process is carried out on special lines for gluten-free products. Himalayan salts, which are processed in accordance with hygienic conditions, are made ready for consumption by being packaged without adding any additives in the final stage.

How to prepare/use:

You can use it instead of refined salt in all your meals. You can use it as a flavor enhancer/decoration in pastries and some chocolate recipes. You can obtain an exfoliating cream by mixing it with natural oils and other useful products. You can use it as a detox by adding it to the bath water. You can use it by evaporating with water or heating it directly to create a refreshed feeling in the environment.

Storage

When kept in suitable conditions, Himalayan salt can be preserved intact like other types of salt. However, it is necessary to store the product closed in a dry, dim and cool environment. In this way, it becomes possible to preserve the ideal form of the product and the components it contains at a high level.

HOW TO DEAL WITH CORNERS AND AWKWARD SPACES IN YOUR CLOSET

Corners in rooms are something we must all contend with when deciding how best to layout our storage. For those of us with attic conversions or dormer-type properties, this can be compounded by awkwardly-shaped walls and ceilings that eat away at the available space that can be used for closets, wardrobes and cabinets. Awkward spaces [L]

HOW TO CHOOSE THE RIGHT LIGHTING FOR YOUR CLOSET

Custom made bedroom furniture can help you to maximise the storage capacity you can extract from the space you have available. But getting the right lighting for a closet is something that's often overlooked. Good lighting helps you to get the most out of your bespoke fitted furniture by illuminating all the corners that would otherwise be cast [L]

Yasmeen Joinery

Let's craft great things together.

WE ARE INVENTORS. DREAMERS. THINKERS. ARTISANS. PERFECTIONISTS. AND CRAFTSMEN.

What's Bespoke?

All our products are bespoke, custom, made to measure. Bespoke doesn't necessarily mean prohibitively expensive or that it requires months to deliver. Bespoke means the piece was created for you, to your exact measurements and specifications, ensuring that regardless of size, requirements, complexities or overall design direction, the piece will fit like a glove and you never have to settle for second best.

The story!

Pronounced as /ku.ro/

The name Kurrow has been derived from the Japanese word 'Kuro', which means black.

Kurrow is the name of our beloved pet dog (Doberman Pinscher), who unfortunately left us when he was just 5 months old.

While we couldn't save him and have him grow with us, we decided to pay a homage by relaunching our brand in his name, so that he could live with us everyday, in our prayers!

Kurrow symbolizes our business in every way, as we have some of the best qualities of a dog - being loyal, serious, affectionate and down-to-earth.

Who you'll work with

Nirveek G. (NG)
Founder

Popularly known as NG within his peers, Nirveek has been instrumental in founding and managing Kurrow, a boutique agency offering white label web development and creative design services tailor made for Small Businesses and Solopreneurs.

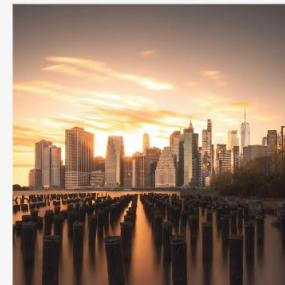

A first generation entrepreneur hailing from India, Nirveek immigrated to the United States in 2022 and is based in New York City.

Nirveek has a MBA degree in Marketing, and over 15 years of experience working with some of the leading corporate houses and digital agencies in various client facing roles and project management. During his corporate stint, he nurtured some of the most prestigious brands including Johnson & Johnson, Tata Steel and ITC. He has won various accolades during his academic and professional days.

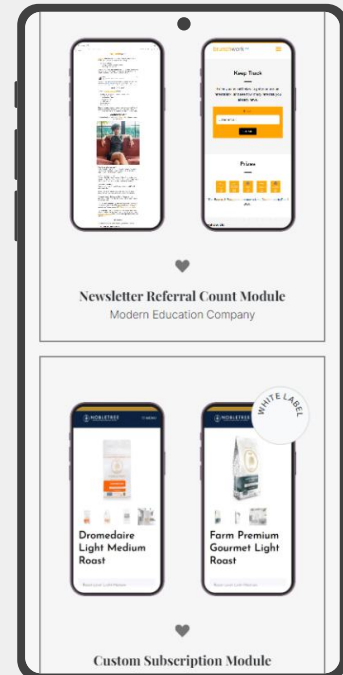

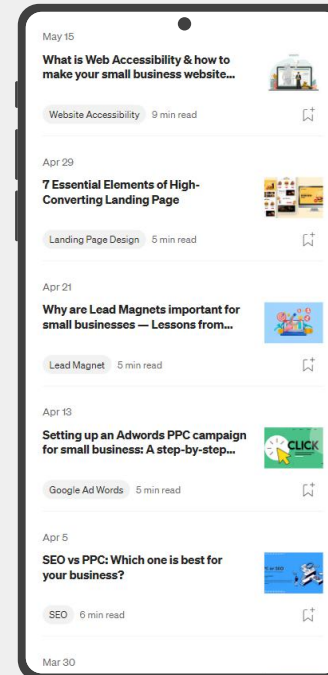

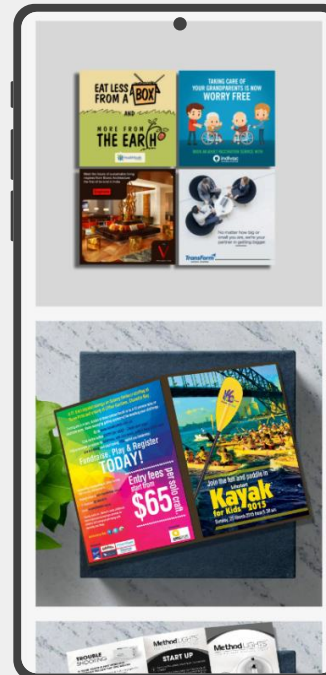

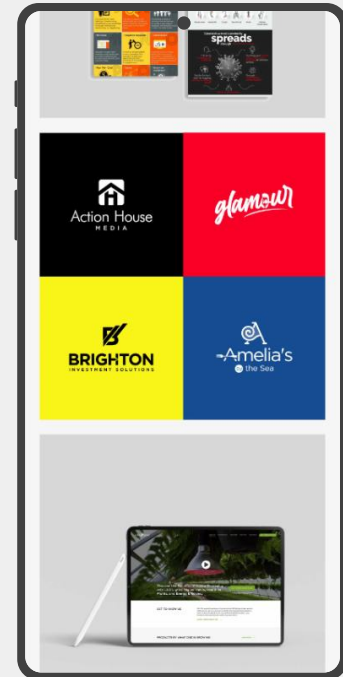

Nirveek is an avid fan of Manchester United and follows the EPL closely. During his leisure time he enjoys cycling and swimming.

White Label Web Design Services

The connection: Neal & Houston

Houston's most popular Local Stand Up Comedian Neal has lived in Houston, Texas for half his life, and his home comedy club, The Riot, is located right in the heart of the city. When not performing at corporate and private events, you can often catch Local Comedian Neal on local comedian shows at comedy clubs and other venues all over the Houston area.

Neal first developed into a local Christian comedian at the Houston Laff Stop, which is no longer around but used to be one of the most famous comedy clubs in the country.

Many of the biggest local comedians we know today performed at the Laff Stop early in their careers, and Neal got to meet and learn from them.

Meet the team

Shawn Henson

He's steadfast in showing owners how to get out of a truck and stop turning the wrench.

Shawn Henson, Mr. 10-4 himself and co-founder of Your Home Services (later rebranded as Integrity Home Solutions), brings more than 20 years of experience in trades-related services. His expertise in sales, marketing, customer service, management, and operations is what allowed him to grow his home service company from \$0 to \$10 million in just four years.

Shawn is the rarest of company owners in the trades industry as he does not come from a technical background. In fact, it was his business acumen that gave him the edge over his competition. In 2021, at the conclusion of his fourth year in business, Shawn successfully sold to a private equity firm.

At the time of his exit, Integrity Home Solutions had 33 trucks (Plumbing and HVAC) on the road and approximately 50 employees. As Co-Founder of Gray Wolf Strategies, Shawn has now decided to dedicate his time and efforts to helping home service businesses grow.

Michael Raymer

For the last few years, Michael has dedicated nearly all his focus to helping service-related business owners grow their companies.

- ✓ Google dominates the global search engine market with a staggering 85.55% share.

OUR PROCESS

How We Do It

Regardless of whether you have a seasoned and well-established website with a long history, or a relatively newer one, or you're in the process of creating a brand new website from scratch, our core SEO methodology maintains its consistency.

Our approach is built upon a comprehensive four-step framework that forms the bedrock of our SEO strategy, ensuring a holistic approach to optimizing your online visibility and performance.

1 Understanding your business

In this phase, we schedule a brief discussion to delve deeper into your company and your SEO goals. Our aim is to understand where you currently stand, where you'd want to be, and if SEO is the right thing for you to do at the current moment - both from a budget and strategic point. Typically, we conduct this through a 15-20 minute phone call, or we can provide a questionnaire for you to complete and return to us.

2 On Page SEO

Once we've gained a thorough understanding of your business and SEO objectives, we begin the preliminary SEO process. This commences with a comprehensive website audit, the finalization of keywords, the curation and optimization of web content where necessary, modify the site for conversion optimization and preparations for the technical SEO phase.

3 Technical SEO

Our technical SEO strategy focuses on four crucial elements: crawling, indexing, rendering, and website architecture. We employ a rigorous 45-point technical SEO checklist that all websites must undergo.

Even in the present day, off-page SEO holds greater significance than any other aspect of organic SEO. Our off-page SEO strategy entails consistent actions beyond your website to enhance your Google ranking. These actions encompass activities such as link building, guest posting, local citations, content marketing, and optimizing your Google My Business (GMB) listing.

THE GUARANTEE

We promise to get your website ranked on the first page of Google!

We are aware of the scams. The numerous false promises made by other SEO agencies/consultants to rank you #1 on Google!

Yet, we guarantee page 1 results. And our confidence in providing this as a guaranteed offering has come from the results we have achieved for our clients. We believe in our process, and it's not a gimmick. We and you both know how hard it is to get ranked on Google. Only 5.7% of all studied pages rank in the top 10 search results within 1 year for at least 1 keyword.

The odds are against us, but you deserve to be on page 1. We'll do it together.

FAQ

Keep It Going!

Sometime, clients becomes impatient and forget that they are competing with similar businesses worldwide when it comes to ranking on Google. Unfortunately, SEO isn't magic and patience is the key here. Organic SEO performs at its best when combined with other forms of content outreach (e.g., social media marketing, video marketing, blog marketing, email marketing etc.).

Therefore, when we undertake a SEO project, we make two requests to our clients:

- ✓ Continue with the existing content outreach efforts.
- ✓ Flexibility and be open to accommodating our suggestions.

FAQ

Intrigued? Want to discuss more?

We understand. And we'd love to work with you. We mean it.

However, it is important to set the right expectations as we embark on this journey together. Organic SEO is a long-term endeavor, and our goal is to secure that coveted page 1 ranking. While the benefits of being on the first page of search results are immense, it's crucial to adopt a patient and adaptable approach.

We value clients who possess these qualities, but rest assured, we won't keep you waiting indefinitely. According to reputable SEO management tools like SEMrush and Ahrefs, it typically takes 9-15 months for a keyword to reach the first page of Google, depending on factors like keyword competition, site quality, and SEO practices. In our prior projects, we've achieved first-page rankings within 6-12 months, depending on keyword and site factors, and we continually strive to expedite this process.

We're committed to your success and eager to work with clients who have realistic expectations, are ready to dive into the world of SEO, and have a long-term budget. If that sounds like you, reach out to us. Let's team up to elevate your business to the top of Google's rankings!

PRICING

Prices that suits Small Businesses

SEO is expensive. Studies have shown that in the United States, comprehensive local SEO packages can go up to \$4000/mo. Small scale local SEO retainers pay between \$800-\$1500/mo. The most popular project rate is between \$2500-\$5000/mo. For those paying by the hour, \$75-\$150/hr. is the most popular hourly rate.

However, we're a small business and our primary clientele consists of small businesses as well. We understand the difficulty of allocating a steep marketing budget in the early stages, especially without immediate results. We thrive on growing alongside our clients and have tailored our SEO pricing plans to align with the needs of a small business.

Starter \$499/mo.

1-4 page websites | 4-10 keywords*

INCLUDES

- ✔ Four-step SEO process
- ✔ Monthly Reporting

Stable \$799/mo.

5-12 page websites | 8-25 keywords*

INCLUDES

- ✔ Four-step SEO process
- ✔ Monthly Reporting
- ✔ 10% monthly budget spend towards premium outreach

Super \$1199/mo.

12+ page websites or Online Stores | 25-40 keywords*

INCLUDES

- ✔ Four-step SEO process
- ✔ Monthly Reporting
- ✔ 10% monthly budget spend towards premium outreach

* The final # of keywords will depend on the # of pages the site has. We do not recommend more than (1-4 keywords) per page. The ideal # is one main keyword, and 2-3 sub keywords per page.

Our SEO plans entail consistent efforts across all websites, regardless of size. Whether it's a single-page site or a large e-commerce platform, we employ the same processes uniformly.
